

Swan

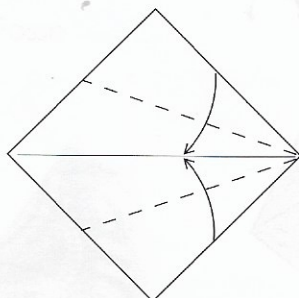

Designed by Elsa Chen & Michael G. LaFosse

Butterfly

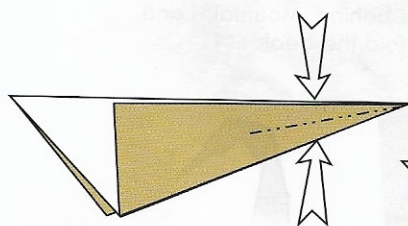

1. Begin with the desired wing, neck and head color side down. Fold in half, corner to corner. Unfold.

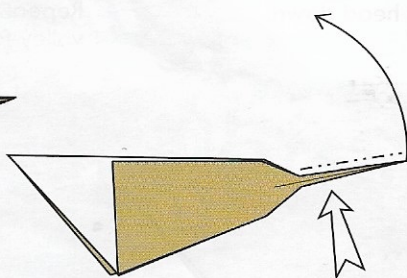

2. Fold the right edges to the crease.

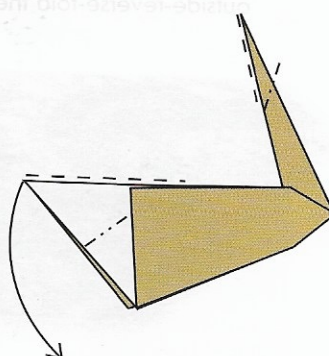

3. Mountain-fold in half.

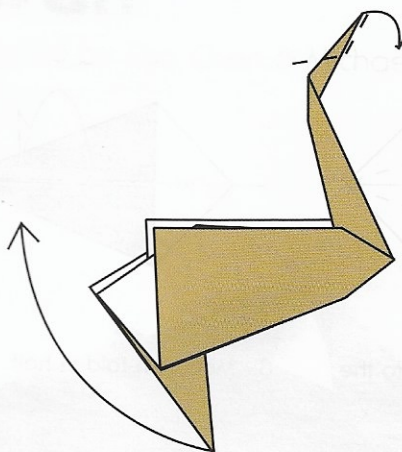

4. Pinch the narrow end to flatten the point. Make sure that an equal number of layers move in opposite directions: two towards you and two away.

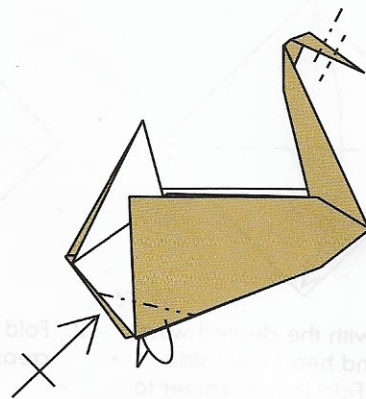

5. Push up the flattened point, mountain-folding it in half.

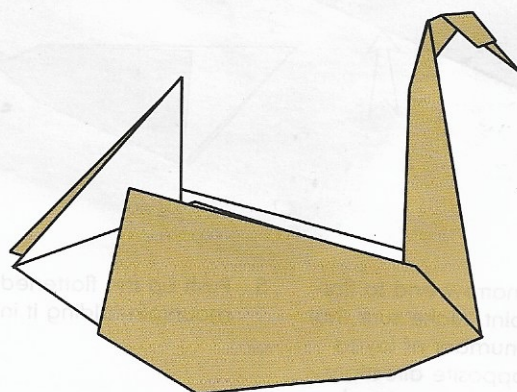

6. Inside-reverse-fold the tail down and inside-reverse-fold the head forward.

7. Inside-reverse-fold the tail up and outside-reverse-fold the head down.

8. Mountain-fold the back end in. Repeat behind. Mountain- and valley-fold the beak.

9. The finished Swan.
